

## Product recall of wooden rollers - used in products for small children **under** 3 years.

### **Why are we recalling this product and what is the hazard?**

During our continual quality control, we have found that our internationally recognized test laboratory, has made an error whilst testing the wooden roller with silicone rings on the wheels.

This means that we have manufactured and sold wooden rollers with wheels that have removable silicone rings which are considered small parts.

If the wooden roller is used in products for small children under 3 years old, the rings present a choking hazard, as they can be removed from the wheels.

If the wooden roller is used without the silicone rings on the wheels, it is safe for children under 3 years.

As these wooden rollers are purchased and used in many different end products, it is important to mention that they can be used by children over the age of 3 years and adults, without this hazard.

### **What should I do?**

If you have purchased and used the wooden roller in a product for a small child under 3 years old, remove the silicone rings from the wheels, just in case – the wooden roller will work excellently without the rings.

Alternatively, you contact the place of purchase for a refund.

### **Which products are included in this recall?**

Only item nr 16160 is included in this recall.

We apologize for any inconvenience this may cause.
