

Go handmade

quality design in a unique style

Made with love

Baby & Kids DIY universe
- for you who crochet & knit

Welcome to Go handmade

My name is Hanne and I am the founder of Go handmade. I was born in Denmark, in Odense - hometown of Hans Christian Andersen. His fairy tales have always been very special to me and - I think - is the reason why I do what I do for a living, today.

My childhood was quite challenging and that is why, being able to do something on my own premises, as well as finding joy in my imagination, came quite naturally.

I have a deep passion for high quality materials and handcrafting: the accomplishment of unique things you can create with your hands - the joy of handcrafting and, of course, also the delight of giving away the result.

It is always a pleasure to be the happy recipient of something that was made with lots of love, with knitting needles or crochet hook. Yes, it is always a thrill to receive a piece of handcraft. To many people, handcrafting, crocheting or knitting can be a sort of therapy. It adds quality to life when you can immerse yourself in a good pattern and watch and feel the project taking shape.

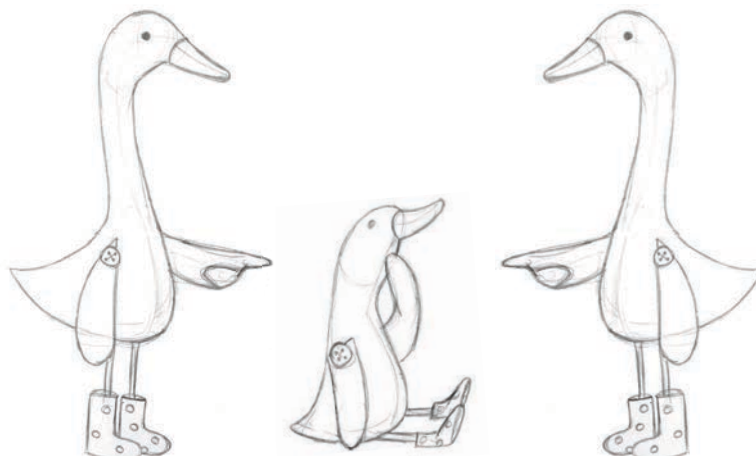

Throughout my adult life, I have not become a skilled knitter or crocheter myself. My huge passion is to create a unique universe of materials for knitting, crocheting and sewing. And this is where my vivid imagination is important. I have to admit that I still play a lot in my mind, if you can put it that way. All the handmade animals and the patterns, that we have developed in Go handmade - yes, I can say without exaggeration that I love them all and I am enjoying being the one taking care of all our inspiration images.

I often bring the "animals" on my trips in order to get some good pictures where the toys can be styled in beautiful natural sceneries. I have a favourite place in the south of France where the river Le Loup runs through the town of Pont du Loup. There are so many natural beauty spots, and I have worked for many hours with the camera, especially with our Sweetheart Bunnies and the Teddies. I love it and can hardly wait to see all the pictures on the computer and in our presentations.

I am passionate about quality products and that is why I have always worked closely with experts and reputable test institutes. Our baby and toddler products (DIY) have gone through various laboratory tests, and we are happy to share the test results. They are all available on our website. Finally, I just want to say that I hope this Baby and Toddler presentation will inspire a lot of creative projects.

Best wishes

Hanne Tolberg

HANDCRAFTS FOR THE LITTLE ONES

We hope to provide you with good ideas and inspiration for your own unique creations. From the time the baby is born, it is important to activate and stimulate the senses in a natural pace that goes along with the development of the little new world citizen. Some of the best things you can give as a gift to the little ones are usually toys, that you have crocheted or knitted with love and affection.

Wooden accessories

” The dog is the man's best friend, it is said, so of course we had to develop our own little pattern so that Poppy could join our fantastic universe.

” Ella on her trolley was developed as we took inspiration from a Danish film series. Every film was called something with "Little Per". In the original films, recorded from 1953 - 1961, Little Per is portrayed as a little boy with big eyes, dark bristly hair and often wearing a knitted turtleneck sweater and a small beanie. Per had a faithful companion - the elephant Bodil, a stuffed animal elephant on wheels. The elephant was named Bodil after a popular actress; Bodil Kjer, who was very famous in Denmark.

” Go handmade's wooden rings are made from the sustainable Schima Superba wood. All wooden rings are polished in a fascinating way, in old wooden barrels. The barrels rotate for 4 - 6 hours with small unpolished wooden beads, resulting in wooden rings with an amazing smooth finish.

Suspender Clips

” To ensure this article is safe for the baby, the length of the pacifier cord is very important. The standard for the pacifier cord indicates a maximal length of 22 cm. The length must be measured with a weight of 2.5 kg attached to the other end of the cord. The length of the cord is measured starting at the loop of the strap up to the point where the pacifier is attached. It is important to ensure that the cord is not longer than the indicated 22 cm. We recommend to always crochet in a firm manner when crocheting pacifier cords and to make them shorter from the start.

” When you knit or crochet for the little ones, you have to always make sure that the article is strong enough. That's why we recommend that projects you make yourself be made as per the applicable standard of a store-bought article.

Cute TEDDY BEAR

The music box, which also has a cord, is placed into Teddy's stomach. It is possible to attach the pulling cord onto a wooden ring - D55 mm - and here as well, it is recommended to ensure that the length - safety length - of the cord does not exceed 22 cm. The "free" length is measured when the cord is completely pulled out of the Teddy's stomach up until the point where the cord is attached to the ring. The cord in the music box is too long at the start because it needs to suit the size of many Teddies. That's why you need to cut the cord to the right length yourself.

” Use Ring Links to decorate your stroller/pram and to bring stimulating toys for the baby on your walks. The Ring Links are practical and easy to hang on the stroller/pram. Perfect for those who always want toys on the trip.

The sweetest SENSORY BUNNY

Our sensory bunnies are soft cuddling toys as well as stimulating activity toys at the same time.

The bunnies have a teething ring on one side and a wooden ring on the other side. There are squeakers in the hands, rattle boxes in the feet and rattle cellophane in the ears. An activity toy that sharpens baby's sensory abilities.

The sound features make it fun and interesting for the baby to touch and play with - right up to

the age of 1 year
- maybe even longer.

The bunny will become a dear friend and the children will probably keep them for years and years.

For baby's safety, any rigid parts sewn into e.g., soft-filled parts, as legs or hands of a toy - should not be larger than 3 cm in any dimension.

A "QUACKY" FRIEND

As the most natural thing in the world, babies will put things in their mouths. This is how it has always been, and this is how we believe it will continue to be. When the gums start to itch, as teeth start to grow, it is soothing for the baby to have something soft to chew on.

Our sweet duck with bite-feet is not to be missed - cozy and easy for the baby to put in the mouth.

Soft TPE figures

Go handmade's collection of soft TPE toys have been manufactured from an exquisite material - TPE. TPE feels good against the skin, it looks nice and is incredibly soft. TPE is very popular due to its high degree of recyclability. All teething toys have undergone a very thorough careful treatment - a handmade finish that only the most skilled hands can ensure. If you examine the toys, you will immediately be able to feel what an outstanding finish it is.

Baby's sensory development

Suggestions for baby toys, the first 3 months

Before baby can grab things, there is a joy in watching and listening. Sounds as well as soft and calm melodies will catch the attention.

Suggestions for toys for baby, 3 - 6 months old

Baby tries to grab things that look interesting to investigate it. At this stage of development, toys with various sounds, materials and textures are a great success. The more to investigate, the better.

- Teething toys - many babies love to put a soft teether in the mouth, especially when teeth are starting to grow.
- Rattles with sound - squeakers and rattling sounds are popular.
- Activity toys - like a cube. The baby is able to hold on to it, and then investigate all the features; squeaky sounds, crackling and rattling sounds - and even a mirror - all to arouse baby's curiosity.

AN ADORABLE AND HUGGABLE FRIEND

Sweetheart Bunny - with the long ears and the dearest eyes - one cannot help falling in love. Bunnies are some of Go handmade's most popular toy animals. Toy bunnies are loved by many babies and toddlers, and they have inspired us to develop them as teethingers too.

Silicone beads

- ” Silicone figures, O-rings and beads of the very best top quality. Silicone rings can be attached to the baby's pacifier. For example, combine the ring with a crocheted strap, which is attached to a dispenser clip with breathing holes. The dispenser clip is put on the baby's clothes, so the pacifier will always be within reach. The silicone beads can, for example, be used as beads in a pacifier chain or in a pram chain.
- When you need to be completely safe - Go handmade's baby silicone collection has been tested for toxic and harmful substances and passed all tests. All tests are performed at the best and reputable testing institutes.

Baby shower

What is a baby shower?

It is a party held to celebrate the expected birth of a baby and a way for friends and family to help the parents collecting many of the things that baby needs.

The party is usually held a month or two before the expected birth.

A baby shower is originally an American tradition. Presents are an important part of the party. The last word "shower" is often assumed to mean that the expectant parents are "showered" with gifts.

Traditionally, it is a friend or close family member who arranges a baby shower for the expecting mother.

Typically, baby showers are only held for first-time mothers - that is, at the time when the parents need the gifts the most - but it is getting normal that smaller baby showers are held for following children.

Rattles

” Super soft cuddly cloths for baby. Cuddly cloth, security blanket - call it whatever you want to - fact is that babies love their little cuddly cloth. Baby's best friend - or just a perfect toy to bring on a walk with a stroller/pram.

Eyes, Noses & Joints

EU AND GLOBAL STANDARDS

- Safety standards set requirements for a product and are typically made in the EU – but there are global standards as well. This means that there are official agreements on product safety in terms of the shape, strength, and size of various parts. According to these standards, a product must meet a numbered standard, such as EN 71.
- EN 71 is a series of safety standards that finished toys must meet in order to be presumed safe for children to play with. It therefore also applies to individual parts used when crocheting, knitting, or stitching together a DIY toy.
- Read more about Go handmade's work with suppliers, chemistry, and safety requirements etc. in the document 'How we work' on our website.

NECESSARY MOUNTING REQUIREMENTS

EYES IN YARN PROJECTS (0-3 YEARS)

- **Compliance With Safety Standards:** Our guide ensures that your homemade yarn projects meet the same tensile strength requirements as purchased toys. This is particularly important in yarn products, where variations in material and technique can affect the retention of the eyes.
- **Challenges With Yarn Materials:** Different yarns - some thick and elastic, some loosely crocheted or knitted - pose different demands on the assembly. Therefore, a thorough and specialized mounting process is necessary to ensure that the eyes are firmly and securely attached.
- **Continuous Safety:** Always remember to check your projects regularly - be vigilant and check that they are still intact as time passes.
- **Comparison With Purchased Toys:** Purchased toys often use melted end pieces - a detail we also consider important. When the back piece is melted and pressed flat, it becomes wider than the hole in the backstop, ensuring a more durable attachment over time.
- **Your Responsibility As A Creator:** As the creator of homemade projects and toys for children under three years, a great responsibility accompanies your handiwork. We encourage you to thoroughly familiarize yourself with our instructions to ensure the safety of your project.
- It is crucial that the eyes are solidly affixed into the crocheted/knitted project. Over time, nearly all yarns will loosen, and especially elastic yarns that stretch can create openings. This increases the risk of the entire eye falling out if the mounting is not securely attached to the stitches.
